Summary of Sustainable and Recycling Projects Completed in UAE

2010 - 2018

Serving The Society, Paving The Way For a Better Future For Generations To Come.

HH Sheikh Mohammed Bin Rashid Al Maktoum, Vice-President & Prime Minister of the UAE announced a long-term national initiative to build a green economy in the UAE under the theme 'A green economy for sustainable development.'

In this new era of technology and information, finding solutions for more sustainable growth is the highest goal of any company that seeks continuous improvement in its products and services. As proven under the visionary leadership of the rulers of the UAE, the great successes achieved within a short span of time also become an excellent example to be followed by companies operating out of this great country.

At RAD international, we are thankful to be a small part of this progress. The highest standards of governance and service have been laid by leaders of the UAE and we believe that we have achieved and succeeded in our endeavors because we set our goals high and followed the examples set by these great visionaries.

In our quest to find solutions to be more responsible and to be able to contribute back in some form to this magnificent country, we have identified that our next key area of focus will be "Green Sustainability."
